

# PRODUCT CHANGE NOTICE

TSV Tape and Reel Change - November 2016

## TSV Tape and Reel Change: Product Change Notice

---

### NOMENCLATURE

The original version of the product is referred to as the A1 version, and the new revision is the A2 version. E.g. MicroFJ-60035-TSV-**A1** becomes MicroFJ-60035-TSV-**A2**.

### PRODUCTS AFFECTED

This PCN affects the following J-Series TSV parts:

J-Series		
Size	Part numbers	Estimated first customer ship date of A2 revision
3mm	MicroFJ-30035-TSV	November 2016
6mm	MicroFJ-60035-TSV	November 2016

Table 1

### PRODUCT CHANGE SUMMARY

This PCN is being issued for the above part numbers due to a change in the tape and reel dimensions. There is no change to sensor itself. The A1 and A2 versions of the tape and reel can be seen in the CAD which is linked to in Table 2.

### CUSTOMER IMPACT

The sensor itself is completely unchanged. Impact to customers is anticipated to be negligible and customers who have designed for the A1 version can seamlessly transition to the A2 version. The CAD files linked to in Table 2 can be referred to for details of the changes.

If a purchase order is received by SensL without a specific revision appended to the part number, the default revision on SensL's order system at the time of purchase will be shipped. See Table 1 for the A2 first customer ship dates.

Orders specifying the A1 revision are subject to availability.
